

Features

- FULL PORT 3-way "L" or "T" flow path
- Functions as a diverter, selector or mixing valve
- Four ball seat design allows for full pressure at any port
- Stainless steel hand lever with latch locking
- Actuator ready ISO5211 direct mounting pad
- 316 stainless steel ball and stem
- Energized PTFE ball seats for lower torque and longer life
- Leak free Triple PTFE/FKM stem seal packing
- Environmentally friendly Lead Free brass body
- Certified per NSF372 and NSF61 for potable/drinking water

Applications

Brass Full Port 3-way ball valves are typically used to control water, air, oil, vacuum and other media compatible with the materials of construction. These 3-port valves are ideal where lead free and NSF approved construction are required for potable drinking water. Typically used as a diverter, selector or mixing valve with a variety of flow path options. Unique four ball seat design allows for full pressure at any port. Air or electric actuators are easily direct mounted to the valve using standard ISO5211 mounting pad. This eliminates misalignment and the need for extra mounting brackets and couplings. Suitable for steam service up to 100 PSI. Suitable for vacuum service to 29in Hg.

Operation

Turning the hand lever one quarter-turn (90°) rotates the ball from position 1 to position 2. L-port valves operate as either a two position diverter or selector valve. Standard T-port valves are setup in T2 flow path configuration and easily changed in the field to alternate flow path T1, T3 or T4 (see flow diagram). Stainless steel handle with vinyl grip has pad locking capabilities in either position 1 or 2. Remove the hand lever for access to actuator ready mounting flange.

Construction

Valve Body	Lead free brass C69300
Ball	316 stainless steel, full port
Stem	316 stainless steel
Ball Seats	(4) PTFE (Teflon) energized with FKM (Viton)
Stem Seals	(1) PTFE (Teflon) and dual FKM (Viton) seals
Hand Lever	304 stainless steel with vinyl cover, locking type
Hardware	304 stainless steel

Description

Full port brass 3-way valves can be used as a diverter, selector or mixing function. These three port valves are 3rd party certified for use with potable drinking water. Manually operated with hand lever or remove the lever and direct mount to an air or electric actuator with standard ISO5211 mounting pad. Advanced FOUR seat energized PTFE ball seats are designed for low torque, extended life and allows for full pressure at any port. Leak free PTFE/Viton stem seal design. High performance ball and stem are made of 316SS rather than the typical plated brass.

Approvals

- IAPMO RT certified to:
 - NSF/ANSI 372 - 2011 Drinking Water
 - NSF/ANSI 61 - 2015
 - California Health & Safety 116875
 - Section 1417 of Safe Drinking Water Act
 - Weighted average lead content < = 0.25%
- Meets design MSS-SP-110

Construction Features

Stainless steel handle with vinyl grip

Latch locking handle, pad lockable

3rd party certified for use with potable drinking water, Identified by LF mark for "Lead Free"

Full port 316 stainless steel ball

Energized PTFE ball seats for reduced torque and extended life

316 stainless steel stem with leak free PTFE and dual FKM packing

Functions as a diverter, selector or mixing valve, easily change the flow path

Valve body made of environmentally friendly Lead Free brass, resistant to dezincification and stress corrosion cracking

ISO5211 actuator ready mounting flange

Pressure-Temperature

Pressure Rating*: 400 PSI CWP (27 Bar) non-shock

100 PSI saturated steam

Vacuum service to 29inHg

Temperature Rating: -4 to 344° F (-20 to 173°C)

*See P/T chart
